SUMMARY

Product Manager with 5 years of experience shipping products across financial services and consumer tech. Expert in payment systems and data-driven optimization. Recently shifted into hands-on AI agent development and embedding AI into enterprise workflows. Skilled at translating complex technical needs into clear requirements and delivering scalable solutions with clear success metrics.

PROFESSIONAL EXPERIENCE

Product Manager | Contract

April 2026 - July 2026

Kahana Group Inc

Remote, Chicago

(Worked with the founder to identify potential customer segments and implemented features for the digital products created by the team based on the sprint backlog and product metrics.)

- Prioritized key features in the data-centric enterprise browser with AI assistant, owning features through requirements, development, tests, and release while coordinating cross-functional technical streams.
- Optimized multi-step agent logics to cut hallucination/error rates by 40% while maintaining strict data-access controls.
- Built and launched AI agents using Cursor and Replit that integrated data sources, logic flows to automate Jira task management, resulting in faster sprints and reduced manual coordination overhead.

Technical Product Manager | Contract

December 2025 - March 2026

Rescuing Leftover Cuisine Inc

Remote, NYC

(Hired to rescue a stalled engineering roadmap and optimize internal product operations using the latest AI tools - both web and mobile apps for a distributed non-profit team.)

- Built 7+ Salesforce dashboards and used AI agents/LLMs to manage admin access and permission workflows, cutting 15 hours of weekly manual reporting and enabling data-driven decisions for partnerships and operations teams.
- Drafted the majority of requirements and architecture for a food sustainability app using Claude; owned conceptualization and roadmapping to connect excess inventory with budget-conscious customers.
- Used AI IDEs and LLM-based reasoning to evaluate backlog projects by criticality, then overhauled the engineering roadmap and migration priorities while introducing a standardized operating process for cross-functional teams.

Product Manager | Full-time

July 2021 - July 2024

ICICI Bank Ltd

Onsite, Bangalore

(Part of the Digital channels group, worked with multiple teams, led from ideation till launch and optimized internal operations for 3 major product initiatives in their Mobile App platform with 2M DAU)

- Led high-impact payment features and acted as end-to-end SME for projects (including digital wallets, Auto Pay recurring payments, credit cards), managing the full lifecycle from requirements and design through development, testing, release, production support, and enhancements.
- Partnered with business stakeholders across 19 initiatives to gather, refine, and prioritize requirements; maintained product specs and FAQs while establishing clear communication and timelines.
- Collaborated closely with UI/UX teams to define user journeys and workflows; streamlined UI component standardization across three digital platforms via a cross-functional design system.
- Coordinated UAT and CUG tests by working seamlessly with engineering and QA teams throughout development and resolved quality issues to ensure PCI-DSS/GDPR compliance.
- Drove agile cross-functional collaboration (Business, Design, Engineering) that reduced feedback iterations by 50% through improved communication processes and Figma-based design overlays.
- Translated business refinements into actionable product features and optimized onboarding journeys through A/B testing and behavioral analysis, delivering a 18% reduction in funnel drop-off, and 25% retention improvement.

SKILLS

- **AI Tools:** LLMs | AI Agents & Workflows | RAG concepts | Model Evaluation | Cursor | Replit | GitHub Copilot
- **Product/Collaboration:** Jira | Linear | Confluence | Notion | Figma | Agile/Scrum | Prototyping | Slack | Google Suite
- **Analytics & Data:** SQL | Python | Amplitude | Power BI | Salesforce | dbt | A/B Testing | GA4
- **Certifications:** Google AI Essentials | AI for Product Managers | CSPO | API Design Fundamentals

EDUCATION

University of Illinois Urbana Champaign

Champaign, Illinois

- Master of Science in Engineering Management, *Specialization: Information Technology*

GPA: 3.98/4.00

Indian Institute of Technology Madras

Chennai, India

- Bachelor of Technology in Systems Engineering

GPA: 3.56/4.00
