SUMMARY

Product Manager with 4+ years of experience and a recent master's degree. Proven track record of shipping products across financial services and consumer tech. Expert in payment systems and data-driven optimization. Skilled at adopting AI tools and translating complex technical requirements into scalable solutions.

PROFESSIONAL EXPERIENCE

Product Manager | Contract

April 2026 - July 2026

Kahana Group Inc

Remote

(Worked with the founder to identify potential customer segments and implemented features for the digital products created by the team based on the sprint backlog and product metrics.)

- Prioritized key features in the data-centric enterprise browser with AI assistant, owning features through requirements, design, development, testing, and release while managing cross-functional technical streams.
- Scoped the business and reliability needs into actionable product features, incorporating guardrails and data feedback loops that reduced hallucination/error rates by 20%.

Technical Product Manager | Contract

December 2025 - March 2026

Rescuing Leftover Cuisine Inc

Remote

(Hired to rescue a stalled engineering roadmap and optimize internal product operations - both web and mobile apps for a distributed non-profit team.)

- Reduced manual reporting effort of 15 hours per week by building 8+ Salesforce dashboards for partnerships, lead generation, and operations teams, enabling convenient data-driven decision making for respective stakeholders.
- Conceptualized and roadmapped a food sustainability app to deliver excess inventory to budget-conscious customers.
- Overhauled the engineering roadmap and migration backlog by auditing a cluttered Jira environment and implementing a standardized Operating Process guide for multi-disciplinary teams.

Product Manager | Full-time

July 2021 - July 2024

ICICI Bank Ltd

Onsite

(Part of the Digital channels group, worked with 20+ team members, led from ideation till launch and optimized internal operations for 3 major product initiatives in their Mobile App platform with 2M DAU)

- Led high-impact payment features and acted as end-to-end SME for projects (including digital wallets, Auto Pay recurring payments, credit cards), owning the full lifecycle from requirements and design through development, testing, release, production support, and future enhancements for the initiatives.
- Partnered with business stakeholders to gather, refine, and prioritize requirements; maintained detailed product spec documentation, FAQs, while establishing clear communication and timelines across 19 initiatives.
- Collaborated closely with UI/UX teams to define user journeys and workflows; streamlined UI component standardization across three digital platforms via a cross-functional design system.
- Coordinated UAT and CUG tests by working seamlessly with engineering and QA teams throughout development and resolved quality issues to ensure PCI-DSS/GDPR compliance.
- Drove agile cross-functional collaboration (Business, Design, Engineering) that reduced feedback iterations by 50% through improved communication processes and Figma-based design overlays.
- Translated business refinements into actionable product features and optimized onboarding journeys through A/B testing and behavioral analysis, delivering a 18% reduction in funnel drop-off, and 25% retention improvement.

SKILLS

- **Tools:** JIRA, Confluence, Linear, Dynatrace, MS Office, GA4, Python, SQL, Excel, Git, Figma, Google Suite, PowerBI, Cursor, Claude, Notion, Amplitude, dbt, Salesforce, Copilot
- **Concepts:** Agile/Scrum Methodologies, Data Analytics, Prototyping, Software Development Lifecycle (SDLC)
- **Certifications:** Google AI Essentials | CSPO | AI for Product Managers | API Design Fundamentals

EDUCATION

University of Illinois Urbana Champaign

Champaign, Illinois

- Master of Science in Engineering Management, *Specialization: Information Technology*

GPA: 3.98/4.00

Indian Institute of Technology Madras

Chennai, India

- Bachelor of Technology in Systems Engineering

GPA: 3.56/4.00
